

NOx Sensor Cross Reference Bulletin

Dublin GA, 28th October 2020

We have added Continental Cross references to all our marketing/sales information in relation to NOx sensors and we recommend you to use this cross reference as the best way to choose the correct Dinex Part number.

DinSensor™, NOx Sensors

Our NOx Sensors are:

- Directly replaceable with OE Sensors
- Tested at Dinex Test Center
- Tested and accredited by third party
- A cost effective balance between emission control and Urea consumption
- Stock item for fast delivery
- Easy to install

going the extra mile

This is due to the fact that on some sensors the OE specification has been updated but the OE Part number has not changed. The underlying Continental reference has changed on these newer versions and therefore using Continental part numbers as your primary cross reference is the best way to ensure correct functionality.

In the below picture you can see where on the OEM NOx sensors you can find the Continental reference number.

We are working hard to add the latest specification OEM parts to our portfolio as quickly as possible and will update all marketing/sales information to reflect those newer versions and corresponding additional Continental cross references as soon as possible.

If you have any further queries please contact your local sales manager for support.
